

Encoding and detector schematic (not an observed intensity map)

Legacy: same V repeated 3 times
224 x 224 amplitude input

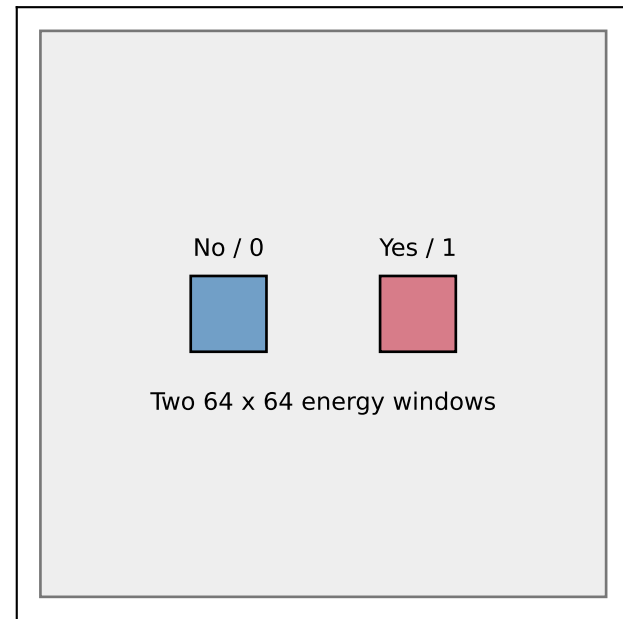

Fractions denote optical power, not amplitude

New two-band raw-audio input
No CNN, no repeated sensor tiles

Power balancing precedes expert routing

Readout after final-layer OEO
478 x 478 active plane

$p(\text{yes}) = E_{\text{yes}} / (E_{\text{no}} + E_{\text{yes}})$
