

A

Input scene

**ADD**

→
Add the ball to the left of the house.

A new object must be placed relative to the house.

Target scene

**B**

Input scene

**REPLACE**

→
Replace the bicycle with a ball.

Only the requested object identity changes.

Target scene

**C**

Input scene

**MOVE**

→
Relocate the dog so it is to the left of the car.

Identity is preserved while the spatial relation changes.

Target scene

**D**

Input scene

**REMOVE**

→
Erase the cat.

The requested object disappears; its neighbours remain.
